

# EXCEL MOUSE POINTERS

As you move the mouse in different areas of the Excel screen, the mouse pointer changes.

The screenshot shows the Microsoft Excel interface with several mouse pointers highlighted by yellow callout boxes:

- ARROW POINTER (point-n-click)**: Located over the 'View' tab in the ribbon.
- ARROW POINTER DOWN to select a column(s)**: Located over column header 'I'.
- TEXT SELECT POINTER**: Located over the text 'I' in cell E1.
- THE CROSS POINTER**: Located over the crosshair symbol in cell C2.
- THE FILL HANDLE**: Located over the small square in the bottom-right corner of cell A1.
- MOVE DATA POINTER**: Located over the four-way arrow symbol in the bottom-right corner of a selected cell containing '1000'.

Dashed green arrows indicate the movement of the mouse pointer from the Fill Handle to the Cross Pointer, from the Cross Pointer to the Text Select Pointer, and from the Move Data Pointer to the Text Select Pointer.
